TITLE : ELECTRONIC EQUIPMENT AND
DISPLAY BODY

ABSTRACT : PROBLEM TO BE SOLVED: To provide an electronic equipment and a display body in which superior display performance, that is the advantage of an organic EL display body, and a low electric power consumption, that is the merit of a liquid crystal display body, are realized.

SOLUTION: The equipment is provided with a liquid crystal panel 20 and an organic EL panel 10 which is light transmissive and arranged and superimposed on the display surface of the panel 20, as display bodies. Among display information to be displayed, first display information which is necessary to be displayed at all times while the power supply is turned on including a waiting screen of a portable telephone 200 and time display or the like, for example is displayed on the panel 20 and second display information, i.e., other information such as display in a dark place and animation display or the like is displayed on the panel 10.
